# Y-280CPX Gaming Headset

FAQ : NOISE ISSUE ON PC

If you hear a static noise in your headset while connected on PC, please find below how to configure Windows and your headset parameters in order to remove this noise:

1) **Headset plugging**

- Plug USB plug and Audio plug on the "BACK" of your computer

- Plug Microphone plug on the "Front" of your computer

2) **Inline controller parameters**

- Put Bass potentiometer (6) at the maximum

- Put Game potentiometer (7) at +/- 70% of the maximum volume

- Put CHAT potentiometer (4) at the maximum

- Put Mic Gain (5) at the maximum

- Switch OFF VOICE FEEDBACK

- Switch ON MIC

3) Windows Audio and Mic settings

- Go to Headphones properties and put **Headphones volume at the maximum**

- Go to Microphone Properties and **untick "Listen to this device"**
